PRODUCT CHANGE

Itelcond aluminium electrolytic screw type capacitors

Itelcond is proud to announce that new materials are being introduced to manufacture the cover decks of the screw type terminal product range.

It is important to remark that all properties and behaviour of the new phenolic resin are comparable or exceeding the characteristics of the materials employed so far in the Itelcond production processes.

The new material is black, while the actual decks have brown colour resin.

We take this opportunity to inform you that Itelcond will continue during a certain amount of time to produce screw type capacitors with both type of decks.

The screw type product ranges series are the followings:

AR/ARU - 85° - 5.000 hrs.
AY/AYU - 85° - 10.000 hrs.
AF/AFU - 85° - 20.000 hrs.
AS/ASU - 85° - 15.000 hrs.
AP/APU - 85° - 12.000 hrs.
AD/ADU - 85° - 10.000 hrs.
AT/ATU - 105° - 8.000 hrs.
AZ/AZU - 105° - 5.000 hrs.
AV/AVU - 105° - 8.000 hrs.

Please note that:

- Capacitors with the new cover decks do not have any changes in external size respect to assembly.
- The ordering code (Part Number System): no changes.

Please contact us for more information.
